As a Special Agent with HSI, I am responsible for conducting a wide range of investigative activities that include narcotics smuggling, financial investigations, fraud, human smuggling, human trafficking, and a wide range of immigration violations (e.g. visa, passport, and naturalization fraud, and large-scale document and benefit fraud). I was selected as a Computer Forensics Agent and subsequently received specialized training by the DHS through the Treasury Computer Forensics Training Program in June 2021. The training included a CompTIA certification as well as training in computer forensics techniques. These techniques consisted of forensic imaging of digital devices; to include computers, mobile devices, and storage devices. This training also focused on the operation and use of several commercially available Computer Forensics Software Suites.
